## A summary of the Facts that Causes Minor Variations in the Fields of Time

When particles travel faster than the speed of light, time becomes distorted.

Higher solar flux activity increases KP levels, which may be acting as a “step down” transformer from the high solar energies that are occurring.

The results of the Emerald Tablets exercise have proven over the years that stronger QI Energy flows during the months from August until December, with the strongest flow in late October in the California region. This is a time period where time imprints from the future during the exercise become more common, especially during condition green periods.

Condition green periods are also accompanied by an increase in cosmic rays.

Inventor Nicola Tesla theorized that cosmic rays and radio waves, when the conditions are right, **can travel faster than the speed of light.**

Einstein stated that matter or waves of energy travelling faster than the speed of light would undergo **time dilation or distort time.**

The increased solar flux of the sun, a time when sunspot activity is more active, can cause radio waves to travel further and much longer distances due to the distortion in the earth's F1 and F2 layers.

Stone Circles have been shown to have time distortion properties. When the sun's solar flux levels are above 4.0 or during “condition red periods”

and performing meditations which ground the body, in a stone circle, the effects felt are much more profound.

**Stonehenge** is built to take advantage of the **midsummer** solstice in June, a time of **maximum** sunlight and **solar activity**. This is also a period where earth's KP levels are at higher than normal levels.

In the Tao, the summer period represents the heart.

The Human **heart** puts out up to 10 times or **more electrical** activity than the human brain.

The Heart Math exercise is used to generate a torrid field of energy by using the energy of unconditional love. This field then creates a "time bubble" from which emotions from the future can be detected.

This is a period where more cosmic rays are penetrating earth's atmosphere.

***Therefore we can derive the following formula:***

$$+ KP = + CR + FW \& SW350 + S = NTB + HM + DE = FTA$$

Where +KP stands for an increase in KP energy after the mid summer solstice until December.

+ CR represents an increase in cosmic rays and FW represents increased solar flux activity or more sunspots & SW350 representing solar wind speeds above 350 + S representing the Star Sirius rising in the east as the Milky Way galaxy sets

=

NTB representing a natural organic time bubble formed by the higher solar wind speeds and higher KP periods. HM represents the heart math exercise to generate a strong torrid field, which is electromagnetically based.

+

DE representing represents accessing the future timeline via emotional detection. Whereas FTA represents the listening of emotions from the future while the field generated via the Heart Math exercise is stable.

If energy from the future is coming through more often during the fall season, than we should be able to use techniques to clearly see further into the future during this time period. Therefore we should be able to assemble an exercise based on the above formula.

### ***The Stock Scan***

One exercise that works is “scan stocks” via biofeedback, by listening for emotions from the future after having sold the stock by pretending you have purchased and sold the stock at the end of the following day.

Another way I have been having fun experimenting with these solar energies is using them to scan for stocks that are going to rise in the next 24 hours. I have found this works best from summer into fall. The main energy responsible for this is the energy generated by the Heart Math exercise. The Human **heart** puts out up to 10 times or **more electrical** activity than the human brain. The Heart Math exercise is used to generate a torrid field of energy by using the energy of unconditional love. This field than creates a “**time bubble**” from which emotions from the future can be detected. This is a simple exercise, that I have been successfully researching so far:

- 1: As the Milky Way sets over the horizon, or the Star Sirius / Orion are rising in the east, I perform the [Heart Math exercise](#) of unconditional love.
- 2: I look at a table of stocks and then visualize myself having purchased that stock 24 hours in advance.
- 3: I next than see myself having sold the stock at the end of the next day.
- 4: If the emotions are uplifting, happy and filled with joy, I know the stock pick is a success, if the emotions are the opposite, the pick is a failure.

This exercise only works during [Stage 1 Condition Orange](#) periods and some Condition Yellow periods. These are periods the KP energies are stronger and the solar wind speed has recently risen above 350. The results seem to be clearer still when the sun's solar flux (or solar activity) is at quiet or lower levels, such as during condition purple periods.

If higher KP energies are the fuel to transport our consciousness or emotions forwards or backwards in time, than it is possibly why the condition yellow exercise works so well. Research has shown that our hearts can be negatively affected by higher KP levels (*geomagnetic storms*), so the opposite is true, we can use our hearts to tap into the KP field, creating a time bubble, which allows us access to emotions from the future. This is still in the experimental stages, but so far having these 3 conditions makes it a perfect time to access the future via emotion.

- 1: A recent rise in KP levels.
- 2: The solar wind speed having risen above 350.
- 3: A quieter or lower solar flux period.

### ***Additional Notes:***

It appears that the longer the solar wind is at a higher speed, when the KP is at active levels, the ability to see through time, just as the milky way is setting over the western horizon is significantly amplified.

Other conditions that may contribute to emotional time detection include:

The sun's south BZ  
A perigee moon  
Fridays  
A full moon  
A new moon  
Condition Yellow Periods

Because this works on torrid heart based principle where a "bubble" is formed, than different timelines must exist and are separated from each

other by "bubbles" of concentrated energy. This means alternate futures exist, separated by bubbles of energy fields.

If higher KP energies are the fuel to transport our consciousness or emotions forwards or backwards in time, than it is possibly why the condition yellow exercise works so well.

## Time Slips

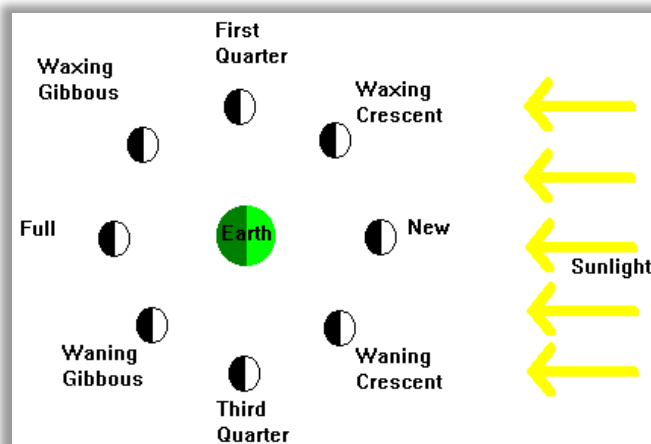

Time-Slip energy can also be used for healing by using the available energy period by picturing yourself in a healing place where your body is thriving and in perfect health.

Here is a possible method to create a time slip.

Energy Requirements:

1: A stronger solar flux from the sun (especially when the KP levels are lower.

2: A large moving mass. This moving mass is based on Einstein's theory

of relativity where  $E=MC^2$ , or energy and mass influence space time. We know that time slips occur or have occurred when people have been in motion or have been travelling to

a location and they suddenly “stop”. There are also examples where a person riding a large mass such as a locomotive experienced a time slip after getting off the train, and people driving cars and stopping at historical locations have also experienced time slips.

Now what besides the earth is a large mass moving close to us? The moon of course. And it is a fact that a new moon exhibits slight gravity anomalies because it is aligned or facing the sun when it is new. Perhaps creating a type of gravity shielding effect.

Hauntings and ghost sightings are really a form of time slip that is occurring, because the location where the events occurred in the past, are coming through to the present or repeating themselves in that location over and over like a tape recording.

Some ghost hunters have concluded that hauntings occurred most often around new moons and also during higher solar activity, which is another term for condition red periods.

One of the more common reported sensations is that scents or smells are experienced during some hauntings. What is interesting is that our research has shown that higher x-ray background radiation levels above 4.0, or during condition red periods, which is a period of higher solar flux activity, the odors or smells become more concentrated or stronger.

At new and full moons the tides can be very high or very low. This induces a bulge in the oceans when it occurs. This bulge I believe distorts the mass of the earth’s oceans slightly. So perhaps just after the peak of a high tide may help induce a time slip or can be used for healing.

So we have the basic fundamentals of a time slip. Let’s put a simple formula together: 24 to 48 hours before or after a new moon, be in a location where historical events have occurred in the past or there is evidence of historical objects, such as history museum. Areas where energy is concentrated such as a church, cave, swimming pool or train station are favorable areas.

Using the quantum [entrainment exercise](#) , project your will to the distant or recent past. If you are using it for healing, than picture a time in the past you were in perfect health. The first thing you might notice is you will start to smell scents that once occurred in the past. Your mind may experience sensations of distant past energy and if you listen enough you may hear sounds. This also works well when there is a strong wind blowing. During high winds during these periods, I have gotten to the point where I could record voices on tape using this technique. Perhaps with enough of the generated EU feeling you could generate a time bubble which would trigger a time slip to the past.

### **Natures Time Stabilization Mechanisms**

In advanced physics there is no future or past, only the present. If the present is when time is experienced, there must be a stabilizing mechanism holding the present together, especially when the huge mass of the sun and moon are influencing the earth. There must be minor fluctuations coming from these large 2 moving masses.

There are 2 periods per year when the moon influences this the most. I theorize that new moons in Spring are bringing energy from the past to the present to stabilize new growth and Fall just after the crescent moon, brings energy from the future to the present to stabilize destruction to make way for future growth. This could explain why some extinct animals reappear from nowhere.

It may also explain why detoxing the body during the new moon is so much more effective because stability of the body's cells are also occurring from new energy coming from the past to the present. A cellular "reset" you might say. New moons are also a period where more negative ions are present in the air. So does this mean negative ions, which are also responsible for having healing effects also can draw some energy from the past to the present?

## Stabilization Peaks

I believe that connecting to the past is stronger during spring because nature always seems vibrant and new. During fall from August to October connecting to the future is stronger because our research has shown that the [Emerald Tablets exercise](#) shows stronger imprints coming from the future during this time.

And if that isn't enough, the movies back to the future also list their time travel dates during October and November. They also mention using a [flux capacitor](#) to travel through time and the measurement of the sun's activity is called the [Sun's solar flux](#).

## The Biorhythms of Planet Earth

I believe that because living things each have cycles, composed of biorhythms, earth being a living life form known as Gaia, also has biorhythmic cycles. From my experiences of performing the Emerald Tablets exercises over the past 6 years, I discovered the following. Here is a quote from one of my research articles:

***"On 2 occasions while performing the Emerald Tablets exercise, I have felt my body become so light, that I thought I would literally go flying off into outer space. I recorded these dates twice, 1 year apart during the month of August."***

Source: EZ3DBIZ.com

[http://www.ez3dbiz.com/quantum\\_consciousness.html](http://www.ez3dbiz.com/quantum_consciousness.html)

After some deeper research I discovered this:

***"Planet Earth has four biorhythm cycles which peak simultaneously once every twenty years. This has occurred on August 12, 1943, 1963 and 1983 and occurred again on August 12, 2003"***

Source: JoanOcean.com

<http://joanocean.com/Portalpng.html>

Earth's biorhythm cycle goes from low to high every 6 months. It begins on August 12<sup>th</sup>, peaks in October with a low in January. And repeats with another peak in March and low around May / June. The next peak is **August of 2014 A.D.**

The longest running Time Travel Science Fiction Show **Dr. Who** first aired during **late November in 1962**, just one year before earth's biorhythm peak.

For those of you who may believe in the Philadelphia experiment, the month of August was when the ships allegedly travelled through time. So if our intuitive abilities are not bound by space or time, than earth's biorhythm cycle for its intuitive/intellectual cycle would be the month of August. Therefore the opposite of intuition is emotion. So 6 months from August is February. So this would be earth's biorhythm cycle for its emotional biorhythm period. August happens to be the time condition greens peak, and February happens to be a time condition blue starts peaking. Therefore perhaps the earth speaks to us through our subconscious more often during August.

## **Emotion and Time**

I remember in my early years of business, I would tithe or donate business funds or supplies to local schools. I would do this to about a dozen schools in my community over a period of weeks each month. This taught me the value of giving back. Well I discovered after doing this for a period of years that when I gave to schools in particular locations which were situated directly across from cemeteries, the law of return from giving was substantially amplified or increased than from other districts.

As we all know when you give back you receive in return, however in my case, a peak in business within the 2 week period of giving to the schools that were across from cemeteries yielded a far greater return in business than other locations.

I finally figured out why this was. It is because cemeteries are historical **concentrated places of emotional energy**. The historical emotional

energy is stronger at some points than at others. This explains why bands who record CD's, have a surge in sales when they are first released, or movies do their best when they first come out, not because people think it is new, but because people are attracted to the **emotional energy** that has been generated during the recording of the song, or the making of the movie.

## **Time slips into the Future**

As mentioned previously, if energy from the future is coming through more often during the fall season, than we should be able to use techniques to clearly see further into the future during this time period. Another Time Slip exercise I have been experimenting with over the past few years, and which works exceptionally well from July until about November is to “scan stocks” via biofeedback, by listening for emotions from the future after having sold the stock by pretending I have purchased and sold the stock.

This is how I Do it:

1: As the Milky Way sets over the horizon, or the Star Sirius / Orion are rising in the east, I perform the [Heart Math exercise](#) of unconditional love.

I then visualize myself having purchased that stock 24 hours in advance. I next then see myself having sold the stock at the end of the next day. If the emotions are uplifting, happy and filled with joy, I know the stock pick is a success, if the emotions are the opposite, the pick is a failure. This exercise only works during [Stage 1 Condition Orange](#) periods when KP energies are stronger. If higher KP energies are the fuel to transport our consciousness or emotions forwards or backwards in time, than it is possibly why the condition yellow exercise works so well.

## Time slips and Stone Circles

I sometimes meditate in a stone circle, and have noticed that when the Solar flux levels are above 4.0 or during a condition red period the results from meditating are much stronger. Could stone circles be slowing down time?, perhaps the stones acting as a shield against the flowing atoms of time?

[Time slips and Stone Circles](#)

[The Stonehenge Circle and the Moon](#)

## Could Intuition or Emotion Be Helping Some People Alter Gravity?

So what is another method we can use to determine the influence of gravity affecting space time locally? Let's take the world of weight lifting, which is a large mass that generates pressure that at the microscopic level may be affecting space time. Because we know that August is the month where earth's biorhythm peaks and that intuition is not limited by space and time, therefore, if a weight lifter's intuitive biorhythm is at their peak, they should experience positive results.

A Google search for **Weight Lifter + Biorhythm** shows many research studies proving this.

Additional Resources researching Biorhythms and Athletes:

<http://www.angelfire.com/oh5/waltnaken/WeightliftingBiorhythms.html>

An excellent book is **Biorhythms and the Weightlifter for Defying**

**Gravity** - Bill Starr available at:

<http://www.scribd.com/doc/97220394/6/Biorhythms-and-the-Weightlifter>

Because August is the month where earth's biorhythm peaks, there should be world records set during this month. Which this research also confirms:

*"The greatest weight lifted with the human tongue was 12.5 kg (27 lb 8.96 oz) by Mr. Thomas Blackthorne (UK). He lifted the weight hooked through his tongue on the set of El Show Olímpico, in Mexico City, Mexico, on the date of 1 August 2008"*

Source: Guinness World Records

<http://www.guinnessworldrecords.com/heaviest-weight-lifted-by-tongue/>

This anomaly has also been scientifically confirmed:

***"The average variability in Earth's gravity field during August 2002 varied compared to the yearly average of 2001."***

Source: Earth Observatory

<http://earthobservatory.nasa.gov/Features/GRACE/page3.php>

Perhaps world records are set because the local region absorbs and imprints this emotional / intuitive energy from repetitive acts, releasing itself at the right time through intention, helping to achieve positive results. This would mean that intention may be a result of previous acts of intuition/intellectual efforts.

Defying Gravity: How to Win at Weightlifting

[http://aasgaardco.com/store/store.php?crn=199&rn=294&action=show\\_detail](http://aasgaardco.com/store/store.php?crn=199&rn=294&action=show_detail)

Another peak period I have noticed is during condition blue periods, when the solar flux is higher, and there is a favorable intuitive biorhythm occurring, especially during August, intuitive and abilities are greatly sharpened. And during March/April, the power of intention is greatly enhanced. So this means that emotions may also be coming from the past through time, perhaps events from major disasters affect the emotions of us in the present, and they travel stronger through time during condition red periods, only if we let them affect us. This could explain why depression is more common during higher KP periods, which is also a period of increased hauntings/time slips.

Much of this paper is theory, written based on past experiences, as well as connecting the dots from others who have experienced timeslips, by examining timeslips, we can gain valuable insight to how our planet heals itself, as well as how we can also use this energy to heal ourselves.

*New Material Added September 11th, 2013.*

## **Did the Perseids meteor shower seed or begin life on earth as we know it?**

*“Over 15 [amino acids](#) (some of the basic components of life) have been identified in the meteorite. All the amino acids found in the Murchison meteorite have been synthesized in laboratory experiments by the action of electric discharge on a mixture of methane, nitrogen, and water with traces of ammonia.”*

Quote: Wikipedia

[http://en.wikipedia.org/wiki/Murchison\\_\(meteorite\)](http://en.wikipedia.org/wiki/Murchison_(meteorite))

The Perseids are a prolific meteor shower associated with the comet Swift-Tuttle. The Perseids are so-called because the point from which they appear to come, called the radiant, lies in the constellation Perseus.

Taurus happens to lay very close to Orion. When HeartMath is performed when Orion is rising in the east, the ability for precognition is greater.

So what happens if we Google

### Perseus + Time Travel or Perseus + Time Machine?

We get all sorts of interesting articles, fiction and other good

written material. So let's put it all together, if we want to build a working time machine, all we need to do is compress the energy coming from this part of the galaxy into a small confined space. When this energy reaches a critical mass, it causes time distortions. This already has been done with the Philadelphia Experiment using radio waves, and when the [Emerald Tablets](#) exercise is performed, it causes significant levitative effects to occur during the month of August. This causes an accelerated erasure of pains and aches and helps swiftly heal the body due to the beneficial time distortion that occurs.

Because light emits radio waves, there is an excellent article titled: Light as a Cosmic Time Machine available from the PBS website discussing this further at the following address:

<http://www.pbs.org/seeinginthedark/astronomy-topics/light-as-a-cosmic-time-machine.html>

The key here is that the Perseids Meteor Shower begins from mid-**July** each year, with the peak in activity between **9 and 14 August**

Source: Wikipedia

<http://en.wikipedia.org/wiki/Perseids>

**Planet Earth has four biorhythm cycles which peak simultaneously once every twenty years. *This has occurred on August 12, 1943, 1963 and 1983 and occurred again on August 12, 2003*"**

Source: JoanOcean.com

<http://joanocean.com/Portalopng.html>

The Philadelphia Experiment: First tests were in **July**, 1943 with serious personnel problems resulting. The final test - **12 August 1943** - was an utter disaster to ship and crew. The ship survived after its return to normal time and location in the Philadelphia harbor.

Source:

[http://www.bibliotecapleyades.net/ciencia/time\\_travel/esp\\_ciencia\\_timetravel08a.htm](http://www.bibliotecapleyades.net/ciencia/time_travel/esp_ciencia_timetravel08a.htm)

The time 13:30 LST Time is when the Milky Way Sets over the Horizon. If you are in Washington D.C. during July each year, the Milky Way Galaxy sets in the west at 13:30 hours LST Time. This has been scientifically proven to be one of the most accurate times to *see through time*. Also called Remote Viewing.

[http://www.remoteviewers.com/htms/updated/info/general\\_rv/sidereal.htm](http://www.remoteviewers.com/htms/updated/info/general_rv/sidereal.htm)

As far as pre-cognition is concerned peaks occur when a person's intuitive biorhythm is peaking. This energy can be used for the following:

**Energy/Emotions from the Future to the Present:** The first 6 to 12 hours of increased [KP levels](#), Condition Oranges and Yellows, Low Solar Flux Activity, perigee moons, Recent or South IMF (or BZ), New Moon.

**Energy/Emotions from the Past to the Present:** Higher Solar Flux Activity, Low KP levels, Apogee Moons, North IMF (or BZ), Full Moons.

Aries/Taurus/Orion/Sirius, Rising Sunspots, Higher Solar Flux = Transmit Energy

Scorpio/Sagittarius /Cygnus, Vega, Lower Sunspots, Lower Solar Flux = Receive Energy

Fast Fact: Higher KP Energy dissolves the distance between gaps in timespace. This would mean that outer space goes through “KP Storms” also known as the Birkland Currents.

*“Birkeland suggested that the horizontal currents were connected to outer space by a system of currents flowing up and down along the geomagnetic field lines”*

Source: Harvard Astrophysics
